

Aerial Work Platform

Aerial Work Platforms - There are a lot of attachments for lift trucks which could be used in order to help expand the functionality of your forklift and allow you to lift stuff, handle materials with greater ease or to accomplish clean-up tasks.

Several attachments were particularly designed for the blades themselves. For instance, blade extensions could be used when you require a lot more fork length, which increases lifting capability. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another type utilized whenever moving rolled material in order to make sure it does not roll off of the typical flat forks.

Lifting accessories can be pivoting and telescoping crane attachments. They are available in various kinds. These attachments are often used for transporting metal bars, poles, lumber or any type of bulky stuff. Other accessories such as various kinds of hooks and hook plates are existing in order to lift items with a sling or chain. Slab lifters and magnetic filters are other objects that could be utilized together with hook accessories. Slab lifters are specialized accessories that are meant for carrying a variety of materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your lift truck in order to make transferring rolls of carpet much easier. The accessory connects onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are many types of lift truck attachment utilized for facility maintenance like for instance snow blades. These industrial forks could be connected to front end loaders and utilized for transferring materials like mulch, snow as well as dirt. Other popular cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the lift truck forks connect onto for sweeping large spaces like for example parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments like on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up fast and easy.

Material spreaders are other accessories utilized on forklifts. These spreaders are handy for a range of applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment which numerous companies utilize day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units offered that are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location using the forklift. Larger platform models have additional space for personnel in order to carry tools and other essential items intended for the task. Usually work platforms are made of poly material or steel.
